

CONTENTS OF VOLUME 37

E. Aguilera and R. Fierro, <i>Weak convergence of a numerical scheme for stochastic differential equations</i>	201–215
H. Albrecher and J. Ivanovs, <i>On the joint distribution of tax payments and capital injections for a Lévy risk model</i>	219–227
D. Aldous, <i>The SI and SIR epidemics on general networks</i>	229–234
S. Asmussen, E. Hashorva, P. J. Laub, and T. Taimre, <i>Tail asymptotics of light-tailed Weibull-like sums</i>	235–256
A. Aveklouris, M. Vlasiou, J. Zhang, and B. Zwart, <i>Heavy-traffic approximations for a layered network with limited resources</i>	497–532
O. Boxma, <i>see</i> M. Saxena, O. Boxma, S. Kapodistria, and R. Núñez Queija	
D. Daley, <i>Renewal function asymptotics refined à la Feller</i>	291–298
K. Dębicki and E. Hashorva, <i>On extremal index of max-stable stationary processes</i>	299–317
B. Dyda and J. Tugaut, <i>Exponential rate of convergence independent of the dimension in a mean-field system of particles</i>	145–161
R. Fierro, <i>see</i> E. Aguilera and R. Fierro	
S. Foss, D. Korshunov, Z. Palmowski, and T. Rolski, <i>Two-dimensional ruin probability for subexponential claim size</i>	319–335
A. M. Gdula and A. Krajka, <i>Strong law of large numbers for random variables with multidimensional indices</i>	185–199
J. E. Glynn, <i>see</i> P. W. Glynn, J. E. Glynn, and S. Rai	
P. W. Glynn, J. E. Glynn, and S. Rai, <i>Recurrence classification for a family of non-linear storage models</i>	337–353
N. Gribkova, <i>Cramér type large deviations for trimmed L-statistics</i>	101–118
T. Grzywny, T. Jakubowski, and G. Żurek, <i>Green function for gradient perturbation of unimodal Lévy processes</i>	119–143
E. Hashorva, <i>see</i> S. Asmussen, E. Hashorva, P. J. Laub, and T. Taimre	
E. Hashorva, <i>see</i> K. Dębicki and E. Hashorva	

R. Hess, <i>see</i> B. Kriesche, R. Hess, and V. Schmidt	
J. Ivanovs, <i>see</i> H. Albrecher and J. Ivanovs	
T. Jakubowski, <i>see</i> T. Grzywny, T. Jakubowski, and G. Żurek	
O. Kallenberg, <i>Tangential existence and comparison, with applications to single and multiple integration</i>	21–52
S. Kapodistria, <i>see</i> M. Saxena, O. Boxma, S. Kapodistria, and R. Núñez Queija	
V. Knopova and A. Kulik, <i>Intrinsic compound kernel estimates for the transition probability density of Lévy-type processes and their applications</i>	53–100
D. Korshunov, <i>see</i> S. Foss, D. Korshunov, Z. Palmowski, and T. Rolski	
A. Krajka, <i>see</i> A. M. Gdula and A. Krajka	
B. Kriesche, R. Hess, and V. Schmidt, <i>A point process approach for spatial stochastic modeling of thunderstorm cells . . .</i>	471–496
A. Kulik, <i>see</i> V. Knopova and A. Kulik	
P. J. Laub, <i>see</i> S. Asmussen, E. Hashorva, P. J. Laub, and T. Taimre	
J. Markevičiūtė, <i>Functional limit theorems in Hölder space for residuals of nearly nonstationary AR(1) process</i>	163–183
M. Matsui, T. Mikosch, and G. Samorodnitsky, <i>Distance covariance for stochastic processes</i>	355–372
Z. Michna, <i>Remarks on Pickands' theorem</i>	373–393
T. Mikosch, <i>see</i> M. Matsui, T. Mikosch, and G. Samorodnitsky	
M. Miyazawa, <i>Martingale approach for tail asymptotic problems in the generalized Jackson network</i>	395–430
N. Miyoshi and T. Shirai, <i>Tail asymptotics of signal-to-interference ratio distribution in spatial cellular network models . . .</i>	431–453
R. Núñez Queija, <i>see</i> M. Saxena, O. Boxma, S. Kapodistria, and R. Núñez Queija	
Z. Palmowski, <i>see</i> S. Foss, D. Korshunov, Z. Palmowski, and T. Rolski	
Z. Palmowski and P. Świątek, <i>A note on first passage probabilities of a Lévy process reflected at a general barrier</i>	455–469
S. Rai, <i>see</i> P. W. Glynn, J. E. Glynn, and S. Rai	
T. Rolski, <i>see</i> S. Foss, D. Korshunov, Z. Palmowski, and T. Rolski	

T. Rolski and W. A. Woyczyński, <i>In memoriam: Czesław Ryll-Nardzewski's contributions to probability theory</i>	1–20
G. Samorodnitsky, <i>see</i> M. Matsui, T. Mikosch, and G. Samorodnitsky	
M. Saxena, O. Boxma, S. Kapodistria, and R. Núñez Queija, <i>Two queues with random time-limited polling</i>	257–289
V. Schmidt, <i>see</i> B. Kriesche, R. Hess, and V. Schmidt	
T. Shirai, <i>see</i> N. Miyoshi and T. Shirai	
P. Świątek, <i>see</i> Z. Palmowski and P. Świątek	
T. Taimre, <i>see</i> S. Asmussen, E. Hashorva, P. J. Laub, and T. Taimre	
J. Tugaut, <i>see</i> B. Dyda and J. Tugaut	
M. Vlasiou, <i>see</i> A. Aveklouris, M. Vlasiou, J. Zhang, and B. Zwart	
W. A. Woyczyński, <i>see</i> T. Rolski and W. A. Woyczyński	
J. Zhang, <i>see</i> A. Aveklouris, M. Vlasiou, J. Zhang, and B. Zwart	
G. Żurek, <i>see</i> T. Grzywny, T. Jakubowski, and G. Żurek	
B. Zwart, <i>see</i> A. Aveklouris, M. Vlasiou, J. Zhang, and B. Zwart
